**RESOLUTION ON THE ANNUAL ADMINISTRATION REPORT OF THE DEPARTMENT OF INDUSTRIES FOR THE YEAR 1928-29.**

**GOVERNMENT OF BENGAL.**

**Department of Agriculture and Industries.**

CALCUTTA, THE 9TH DECEMBER 1929.

**RESOLUTION—No. 5905Ind.**

Read—

Annual Administration report of the Department of Industries for the year 1928-29.

The most important administrative change of consequence that took place during the year under review was the transfer of control of all district and peripatetic weaving schools and of the weaving demonstration parties from the Principal, Serampore Weaving Institute, to the Directorate at Calcutta. The growing importance of the Central Weaving Institute at Serampore emphatically pointed to the necessity of relieving its head of all outside duties, while, at the same time, it was considered essentially necessary that the headquarters staff of the department should be in direct touch with the organisation and inspection of mufassal weaving schools and demonstration parties. The abovementioned arrangement necessitated the transfer of the Assistant Principal of the Serampore Weaving Institute to the staff of the Director under the altered designation of Weaving Expert and Assistant Inspector of Weaving Schools. Government have no doubt that this arrangement will result in the more effective control and supervision of the Central Institute as well as of the outlying weaving schools and demonstration parties.

The only other important change was the retirement of Mr. E. Hoogewerf, Principal, Serampore Weaving Institute, who was superannuated on 3rd April 1929. In view of the importance of the charge the selection of a successor to Mr. Hoogewerf has not been an easy matter, and Government have sought for the assistance of the Provincial Selection Board in this connection.

Government have perused with interest the Director's "general observations" on development of industries, and note with satisfaction the encouraging feature that new concerns already provide employment for a number of *ex-students* of the Serampore Weaving Institute and also open an avenue for employment for the successful students of the Berhampore Silk Weaving Institute.

In the opinion of Government the activities of the local industries department should, under the existing circumstances, be directed mainly towards development of cottage and small scale industries. The Royal Agricultural Commission has brought into prominence the well-known fact that while agriculture is the main industry of this country, that alone cannot keep the cultivators occupied throughout the year, and that with a view to ameliorating their economic condition some occupation should be found for their spare time. As suggested by the Commission (and as also emphasised by the Industrial Commission more than a decade ago) manufacture on cottage industry lines is the most useful spare-time occupation for this class of people. The home industries of this country have a tradition of their own, and as observed by the Indian Industrial Commission, 1916-18, they have so far generally stood successfully against the intense competition of factory products, foreign or Indian. But in order to make the position of these domestic industries secure against factory competition the main thing necessary is the substitution of primitive methods by modern processes. This is one of the lines on which the Government industries department can assist the development of home industries. Another direction in which the activities of the department may be usefully directed for the amelioration of the condition of village artisans is to educate them on modern lines so far as village manufacture is concerned. They are proverbially conservative and lacking in ambition. Unless and until it can be brought home to their minds by simple methods of teaching and more effectively by ocular demonstration that the adoption of modern methods of manufacture will save their labour and time they can hardly be expected to give up their primitive methods to which they have been wedded for generations past. Another way of assisting the

village artisans is to extricate them from debt. The only possible way in which this can be done is by the formation of co-operative credit societies. The last but not the least important form of assistance that can be rendered to the development of cottage industries is to organise a market for them. Here again the formation of co-operative sale societies is the most effective solution.

Turning now to the detailed activities of the several sections of the department Government would record the following observations :—

**Industrial Chemical Department.**—

It is gratifying to notice that in this section, not only is research being systematically carried on in the laboratory, but arrangement has also been made for the demonstration of the successful results of research and experiment conducted by the Industrial Chemist. It is also encouraging to note that the training provided at the research laboratory for apprentices in soap-making has been attracting a fair number of students. It is also a good sign that reference is frequently made to this section for technical assistance and advice, and that it is readily given wherever possible. The departmental bulletins are also useful publications.

**Engineering Section.**—The record of the activities of the engineering section of the department is interesting reading. The Industrial Engineer has investigated the condition of a number of industries and has written various reports which indicate much industry and keenness. Among them the report on the match industry and his investigation into the condition of the hosiery industry may be specifically mentioned. Such investigations are essential preliminaries to all industrial development. The report on the survey of cottage industries conducted years ago is being brought uptodate from time to time, but it does not supply the detailed information necessary for the purpose of ascertaining local needs and of deciding on what lines development is possible. At the instance of the Director Government have, therefore, administratively approved the creation of two temporary posts of Industrial Surveyors to assist the Industrial Engineer in the investigation of indigenous industries and in the collection of local commercial and industrial intelligence. The appointment of these officers is now awaiting provision

of funds. It is highly creditable that working so far single-handed, the Industrial Engineer besides collecting information has designed and produced a number of labour-saving machines, which have already proved successful. Of these the conch-shell cutting machine, the paddy-husking machine and the umbrella-bending and marking machines may be mentioned. Government note that pending proper equipment of his part of the research laboratory, the Industrial Engineer is having his experimental machines manufactured by private firms. When the condition of provincial revenues makes it possible to equip properly the engineering section of the laboratory the Industrial Engineer will, it is hoped, have much greater facilities for his work.

The results of experiments and demonstrations carried out in this section as stated in the report are very encouraging—some of them, *e.g.*, that in connection with the drying of boiled paddy will remove a long-felt want. The direct results of these demonstrations are illustrated by the fact that in the course of seven months over 400 paddy-husking machines devised by the Industrial Engineer were sold, while at Chittagong an organised factory for the production, bending and marking of umbrella handles has been established.

Some of the activities of this section deserve special notice as they should help to solve the vexed problem of middle class unemployment. Of these may be particularly mentioned the umbrella-making class opened at the research laboratory.

In this section also assistance has been readily given to industrialists not only in the shape of technical advice but in having their names enlisted as approved contractors.

**The Bengal Tanning Institute.**—It is pleasing to note that during the year under review the Bengal Tanning Institute has maintained its record of good work in all the main branches of its activities, viz., research, instruction and demonstration. It is gratifying that the investigations into the qualities of available raw hides has disclosed the fact that Bengal hides produce very fine grained leather, so much so that the grains of most of the cow hides are as fine as those of European calf skins. The most striking result of the activities of the institute is to be found in the

fact that the consumption of the Bengal hides in the chrome tanning industry is gradually on the increase, not only in this province but also in other parts of India. Government entirely agree with the Director that half-tanning of leather, opening large possibilities of export trade, should be developed, and that the absence of a particular tanning material (*Cassia Auriculata*), which can be imported from other provinces, should not prove a bar to such development. It is encouraging to note that the initiative given by the institute in this matter is showing tangible results, a number of tanneries in Calcutta now making and exporting half-tanned leather. Another important feature of the activities of this section is the training of apprentices, both on the practical and theoretical sides. It looks hopeful that the chemical training imparted in the institute has been so much appreciated by the trade and that some of the past students of the institute have been successful in securing good positions in commercial laboratories. The demonstration and propaganda work undertaken by this section are also producing their desired effects.

**Technical including weaving education.**—Government note with gratification that technical education in all its branches has been receiving the special attention of the department. As a matter of fact out of a provision of Rs. 8,81,999 on the expenditure side of the Industries Department budget a sum of Rs. 5,84,000 is devoted to the cause of technical education. The three main lines of activities of the department in regard to technical and industrial education are (1) training abroad, (2) maintenance of the Government technical institutions and (3) giving grants-in-aid to non-Government institutions. On all these lines the activities of the department have been marked. In the matter of training abroad the programme of sending out two scholars each year has been kept up, and in addition extensions of term, where necessary, have been granted to scholars already sent. A fresh programme of subjects in which technical scholarships will be given has also been prepared in consultation with the Advisory Board of Industries. Secondly, in pursuance of the

recommendation of the Bengal Retrenchment Committee, reorganisation schemes in regard to three out of four Government technical schools are now completed and administratively approved. Thirdly, the allotment under grants-in-aid is now Rs. 90,000 more than it was three years ago.

In the matter of weaving instruction the progress made by the department is striking. As many as twenty-six peripatetic weaving schools are now at work, while twelve more have been administratively approved. Government are glad to note that the weaving school at Dacca, an important weaving centre, has been opened and that the Berhampore silk weaving school is now in full working order, marked progress in the use and adjustment of the silk twisting machinery having been made largely through the enterprise of Mr. A. N. Sen, Inspector of Technical and Industrial Institutions. The Central Institute at Serampore has kept up its record of good work, though the scheme for upper classes for women students has unfortunately failed. Government trust that when the power loom weaving section is completed weaving education in the province will receive a fresh impetus.

It is also a matter of satisfaction that the Calcutta Technical School within the short period of its existence has been successful in inspiring confidence among the various employing firms so that some of them are now insisting on candidates for apprenticeship in their respective firms passing the entrance examination of the school. Government take this opportunity of thanking these firms for their co-operation in the matter.

Before concluding Government would record their appreciation of the efficient working of the department under Mr. Weston. The thanks of Government are also due to the members of the Advisory Board of Industries and other boards and committees associated with the department for the assistance rendered by them.

#### RESOLUTION.—No. 3015Medl.

#### CALCUTTA, THE 13TH DECEMBER 1929.

Under rule 28 of the Rules under the Medical Act, 1914, Government have taken into consideration the objection made by Babu Amulyadhan Mukerji against the election for the constituency formed by section 4 (b) of the Bengal Medical Act, 1914, as amended by Bengal Act III of 1928, and in the exercise of their powers under the said rule Government declare the election to the Council for this constituency to be void through sufficient cause. It appears that certain of the voting papers have been marked with more than four crosses, one of which was deleted, with the result that doubts arise as to the intention of the voter, and that these papers occurred in sufficient numbers to affect the result in the case of one candidate.

2. As the rules do not provide for the election of one member only out of a plural constituency, Government have no alternative but to declare the whole election for the constituency constituted by section 4 (b) of the Act to be void and to call on the electorate of this constituency to make a fresh election before 28th February 1930. Proceedings will begin from the procedure for nomination laid down

from rule 13 of the rules notified in notification No. 1690Medl., dated 5th July 1929, and fresh nominations should be called for at once.

**IRRIGATION DEPARTMENT.****NOTIFICATIONS.**

No. 44-I.—9th December 1929.—In exercise of the powers conferred by sections 6 and 11 of the Canals Act, 1864 (Bengal Act V of 1864), the Governor in Council is pleased to make and fix, with effect from the 3rd January 1930, the following rules and schedules of rates of toll for the khal known as the first side-cut along the Schillarganj Char Duani Road, joining Nali Done in the south and Shapleza khal in the north, in the Pirojpur subdivision of the Bakarganj district:—

**Rules and Schedule of Rates of Tolls.**

1. Every vessel on entering the channel and before passing the gate at either end or even when entering the channel from a side khal between the gates shall be liable to measurement for the purpose of ascertaining the tolls payable; in case of any reasonable doubt arising, a vessel may be measured again by any person appointed by the District Board of Bakarganj on this behalf.

2. Vessels for the purpose of the determination of maundage shall be divided into two classes as below:—

*Class I.*—To include all vessels of the types of country boats, including saltees and hapors (fish cages), house boats, kosh boats, green boats, etc.

*Class II.*—To include steam boats, motor boats, flats and barges and other square built vessels.

3. The maundage of every vessel, whether laden or empty, shall, for the purpose of Act V (B.C.) of 1864 and of these rules, be determined by the following measurements:—

**CLASS I.**

A. The product of one quarter the length of the vessel from stem to stern, measured along the water line, multiplied by the interior greatest breadth of the vessel, multiplied by the depth from the water-line to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

B. The measurement of the length is to be made in feet, rejecting inches; the measurement of breadth and depth is to be made in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

C. The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of  $12\frac{1}{2}$  maunds, any remainder of less than  $12\frac{1}{2}$  maunds being rejected. In the case of vessels exceeding 500 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 50 maunds, rejecting any remainder of less than 50 maunds.

D. **Saltees.**—The product of one quarter of the inside length of the vessel, measured along the centre line from stem to stern, multiplied by the interior greatest breadth of the vessel, multiplied by the greatest depth measured from the top to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

**CLASS II.**

For vessel of class II the number of maunds obtained by the system of measurement prescribed for vessels of class I shall be increased by one-half. For vessels of this class above 5,000 maunds measurement, the maundage shall be reckoned to the nearest integral multiple of 500 maunds, rejecting any remainder of less than 500 maunds. In the case of steamers and motor boats the maundage determined as above shall be reduced by one-third as an allowance for engine space.

For vessels of class II which are furnished with reliable way bills, the gross maundage of cargo shown by the way bills or in the case of steamers, the maundage obtained from multiplying the registered tonnage of the steamer by 27, may, at the option of the employer of the vessel or the steamer (as the case may be), be taken as the maundage on which tolls will be charged.

4. After the measurement the person in charge of the vessel shall be provided with a slip showing the maundage to be charged, which must be presented at the toll office where he will be provided with a ticket, after payment of toll, which will permit the vessel to pass the gate or proceed through the channel.

5. Every ticket shall have entered on it the name of the sarang, manjee or other person in charge of the vessel, the date of entry, the maundage, the cargo, the amount of toll charged and the number of days for which the ticket remains current.

6. All tolls are payable on demand and shall be paid at the toll office before a vessel is permitted to proceed.

7. The ticket must be kept on board the vessel and in possession of the person in charge of the vessel and must be produced for inspection when demanded by the person authorised to collect tolls, or by any officer to whom such person is subordinate. If on demand the ticket is not produced, such person or officer shall assess the tollage. If on demand the ticket is not produced, such person or officer shall assess the tollage as provided in rules 3 and 12 and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel shall be liable to seizure and detention under the provisions of section 9 of the Act.

8. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the collector of tolls on payment of a fee equal to one quarter of the total tollage, subject to a minimum fee of one anna per ticket.

9. All vessels, whether the property of Government, District Board, other local bodies or of private persons, are liable for toll except those specially exempted under these rules or by a resolution passed by the District Board of Bakarganj from time to time.

10. The canal may be closed once a year for effecting the necessary repairs to it on seven days' notice of the intention so to close it being given; but in the event of any sudden emergency the canal may be closed at any time without prior notice, and no claim in such case by owners of vessels or others for compensation on account of detention shall be entertained.

11. No rafts exceeding 50 feet in length and 5 feet in breadth shall be permitted to enter the canals.

12. The rates of toll shall be as follows:—

- |   |                      |
|---|----------------------|
| (1) On all vessels empty or laden, per hundred maunds ..  | Four annas.          |
| (2) On all vessels empty or laden, for 12½ maunds or less ...   | One-half anna.       |
| (3) On rafts of bamboos, grass, timber, etc., not exceeding 50 feet in length and 5 feet in breadth ... | Two annas each raft. |

Tolls will be levied at Nali and Shapleza.

13. For boats frequently using the canal such as boats carrying passengers, grass or perishable articles monthly tickets will be issued at 10 times the ordinary toll.

14. Every vessel which has paid toll shall be allowed to remain in the canal for three days inclusive of the days of entry into and leaving the canal. A vessel remaining in

any part of the canal longer than three days shall be charged demurrage equal to one-half of the toll for each day in excess of three days. No vessel shall be permitted to remain in the canal for more than one month. Provided that this rule shall not apply to vessels holding monthly tickets under rule 13 above, which may remain in the canal for more than three days without payment of demurrage but not for more than one month at a time.

15. No vessel carrying exclusively police officers or servants, soldiers and officers of the British Army, post mail runners, officers of the Irrigation Department on duty, officers and servants of the toll office for the canal referred to in these rules while on duty, or the vessels of such other persons as may be exempted by a resolution of the District Board of Bakarganj, shall be liable for toll in the canal.

16. Any matter relating to the mode of collection of tolls and other relevant points, not provided for in these rules, shall be decided by the District Board of Bakarganj at a meeting, and shall be subject to the approval of the local Government.

### GOVERNMENT OF INDIA.

#### Legislative Department.

The following Bill was introduced in the Council of State on the 23rd September, 1929:—

C. OF S. BILL NO. 9 OF 1929.

#### *A Bill to prohibit the export of Cattle.*

WHEREAS it is expedient to remove preventible causes for the shortage of agricultural cattle and reduction of the milk supply in British India; and whereas the overseas trade in cattle has appreciably contributed to the said shortage of agricultural cattle and the said reduction of the milk supply; It is hereby enacted as follows:—

2. "Cattle" shall mean and include cows, bulls, bullocks and buffaloes as well as their calves.

Offence.

3. Offence cogni-  
sable and  
bailable.

5. All offences under this Act shall be cognisable and bailable and shall be triable in the manner prescribed for warrant cases by a Magistrate of the first class.

---

**STATEMENT OF OBJECTS AND  
REASONS.**

India is mainly an agricultural country. Cattle are essential to the agriculturist and milk to the great bulk of the population. A large number of cattle has of late been exported every year for the purposes of the trade. This has naturally appreciably raised the prices of cattle and milk. The scarcity of milk is a serious hardship upon the people in general, but its evil results have been most felt in the case of infants. The great rise in

infant mortality during recent years has been distressing. The object of this Bill is to combat these growing evils to some extent by penalising export trade in cattle.

##### Third forecast of the Cotton Crops of Bengal, 1929-30.

Dacca, the 9th December 1929.

(NOTE.—On an average of the five years ending 1927-28, the area under the cotton crops in Bengal has represented some 0·2 per cent. of the total area under cotton in India.)

There are two crops—early and late. The early crop is chiefly grown in the Chittagong Hill Tracts and the Tripura State and to a small extent in other districts. The late crop is chiefly grown in Bankura and Midnapore.

**Character of the season.**—After the publication of the second forecast, the harvesting

operations for the early crop were generally carried on under favourable conditions and a satisfactory crop has been reaped for the Province.

The outlook of the late variety, so far, is fair.

**Area sown.**—The total area sown with early cotton is returned at 76,307 acres and that with late at 1,203 acres, against 77,381 and 753 acres, respectively, in the corresponding forecast of last year.

**Outturn.**—The outturn of the early crop is estimated at 20,290 bales and the late crop at 313 bales, against 20,450 and 117 bales, respectively, in the corresponding forecast of last year.

## DEPARTMENT OF AGRICULTURE, BENGAL.

### Final Forecast of the Bhadoi Crops of Bengal, 1929-30.

**NOTE.**—On an average of the five years ending 1927-28, the area under autumn rice in Bengal has represented some 6.0 per cent. of the total area under rice in British India.)

**Character of the Season.**—As reported in the preliminary forecast, insufficient rainfall up till the middle of April hampered the preparatory tillage and sowings, while good rainfall later on favoured the growth and development of the crops generally, except in parts of some East Bengal districts where untimely heavy rain and early rise of rivers caused damage to lowland crops. Subsequently the conditions were generally favourable and the season, on the whole, may be regarded as a fair one for the crops this year.

**Acreage.**—The total acreage sown with the different *bhadoi* crops this year is reported to be 5,815,100 acres as against 6,444,700 acres last year. Of this, the area under *autumn*

rice is estimated at 5,031,100 acres as against 5,649,000 acres last year. The decrease in area is attributed to drought at sowing time.

**Outturn.**—According to District Officers' estimates, the outturn of the different *bhadoi* crops together for the Presidency works out at 75 per cent. of the normal this year as against 82 per cent. last year.

The *autumn* rice is also estimated to yield an outturn of 75 per cent. of the normal for the province this year as against the estimate of 95 per cent. last year. In my opinion the outturn of *autumn* rice is an under-estimate, and the crop will not fall short of 80 per cent. of the normal this year.

On the basis of a normal yield of 10½ maunds of clean grain per acre, the gross outturn of *bhadoi* paddy (autumn rice) is estimated at 1,589,400 tons this year as against 2,119,200 tons last year, or a decrease of about 25 per cent.

**DEPARTMENT OF AGRICULTURE,  
BENGAL.****Second Forecast of the Winter Rice Crop of  
Bengal, 1929-30.**

(Note.—On an average of the five years ending 1927-28, the area under winter rice in Bengal has represented some 17·7 per cent. of the total area under rice in British India.)

**Character of the Season.**—As reported in the first forecast the weather was generally unfavourable in the early part of the season for the field operations of deep-water paddy in East and parts of North Bengal. The rainfall in May though defective was helpful to the germination of young plants. The rainfall in early June, being heavy, damaged the low land crop in places of East Bengal but helped the sowing of winter paddy in seed-beds elsewhere. This was followed by a weak monsoon resulting in less area being transplanted this year. The growth of the transplanted crop was also retarded in consequence especially in the high land tracts. Good rainfall in October, however, materially increased the outturn of the crop which suffered so long from insufficient rain. On the whole a good crop may be expected for the Province.

**Acreage.**—According to the estimates returned by the District Officers, the total area under winter rice is 14,643,400 acres as compared with 15,323,900 and 15,357,400 acres in the corresponding and final forecasts of last year.

**Outturn.**—From the summary of the district returns appended it will be seen that Bankura reports more than a normal crop. Six districts report a normal crop of 100 per cent.; fourteen districts a crop varying from 82 to 95 per cent. and the rest from 67 to 75 per cent. of the normal. According to the above estimates, the provincial outturn works up to 90 per cent. as against 105 per cent. of the normal, both in the corresponding and final forecasts of last year.

Accepting 90 per cent. as the provincial outturn, the gross yield of the crop, on the basis of a normal yield of 12½ maunds of clean grain per acre, is estimated at 6,051,600 tons this year as against 7,388,300 and 7,404,500 tons, respectively, in the corresponding and final forecasts of last year.

**RESOLUTION ON THE SIXTY-SEVENTH ANNUAL REPORT OF  
THE GOVERNMENT CINCHONA PLANTATIONS AND  
FACTORY IN BENGAL FOR THE YEAR 1928-29.**

**GOVERNMENT OF BENGAL.**

**Revenue Department.**

**Cinchona.**

CALCUTTA, THE 10TH DECEMBER 1929.

**RESOLUTION—No. 16125 CIX.**

Read—

The sixty-seventh annual report of the Government cinchona plantations and factory in Bengal for the year 1928-29.

Read also—

The reports of the previous three years.

Mr. C. C. Calder held charge of the office of Superintendent throughout the year.

2. There are two cinchona plantations maintained by Government in this Presidency, viz., one at Mungpoo and the other at Munsong, both in the district of Darjeeling. There is also a Government factory at Mungpoo, where quinine and its by-products are manufactured from the bark of trees grown on those plantations and from Java and Burma bark obtained from the Government of India. The Revenue Department is concerned with the production of quinine, while its distribution is a matter which primarily concerns the Public Health Department.

3. The survey of the plantations commenced through the agency of the Survey of India, referred to in the resolution on the report for the year 1927-28, was completed during the year under review.

4. The Government of Bengal had under consideration during the year a scheme for the introduction in the Bengal Cinchona Department of a commercial system of accounts as proposed in a report submitted by an officer of the department of the Auditor-General. The scheme is being examined with a view to introducing it experimentally from 1930-31.

5. Extensions were carried out during the year comprising 68 acres in the Mungpoo plantation only. During the year a hail storm did very considerable damage to some cinchona blocks in the Rungbee division on this plantation. A devastating disease which appeared in the nurseries of the Munsong plantation last year is still working its course in spite of the most elaborate precautions taken to disinfect nursery soils and sites. Experiments are being continued but, if these fail, the young plants required for extensions will have to be brought from Mungpoo by lorry. It is for this reason that no extension was carried out in this plantation during the year.

6. The quantity of Bengal bark harvested during the year under review was 1,041,827 lbs. against 917,259 lbs. in the previous year.

7. The quantity of dried bark used in the factory during the year was 1,058,349 lbs., of which 918,072 lbs. was Bengal bark and the rest Java and Burma bark belonging to the Government of India.

Altogether 41,368.5 lbs. of quinine sulphate was manufactured during the year at a cost of Rs. 2.721 per lb.; of this 5,417.5 lbs. belongs to the Government of India. The total quantity of cinchona febrifuge manufactured during the year was 20,501 lbs. of which 3,130 lbs. represents the share of the Government of India. The expenditure incurred on the febrifuge was Rs. 1.820 per lb. Besides 1,126 lbs. of other quinine salts, 1.8 lbs. of quinidine sulphate and 1.9 lbs. of cinchonidine salts were manufactured.

The second purification plant was installed during the year and the result is that the quinine packed since the installation is as white as any brand on the market.

8. No satisfactory solution has yet been found of the difficulty of utilising the large accumulated stock of provincial quinine. Of the several provinces, Bengal is the largest consumer of factory products

having used 9,096 lbs. of quinine salts and 10,116 lbs. of cinchona febrifuge, of which 4,607 lbs. and 4,521 lbs., respectively, were used in hospitals and dispensaries and 913 lbs. and 1,493 lbs., respectively, were used by district boards, local boards, union boards and municipalities. These figures represent only a fraction of the actual requirements of the population for it is well known that, while stocks are accumulating in depôts, there are large numbers of unrelieved sufferers from malaria. The difficulty unfortunately lies in the fact that any attempt to reduce the price of quinine in India below the world level would probably result in wholesale exportation which would deplete the stocks in India to the advantage of exporters without corresponding benefit to the people of India.

A possible solution would be to prohibit export, but this would put a premium on smuggling and is a problem which is connected with the distribution of quinine rather than its production.

9. The total expenditure of the department incurred during the year including pensionary charges was Rs. 4,16,925-1-3; the total receipts, exclusive of Rs. 7,806-2-9 from land rent, grazing fees, fines and compensation for damage paid into the treasury not to the credit of the cinchona department, were Rs. 6,46,746-5-6. The expenditure was lower by Rs. 31,319-8-6 and the receipts were higher by Rs. 1,08,543-15-9 than in the preceding year. The profit on the year's working amounted to Rs. 3,11,192.

10. The figures contained in the report indicate that very satisfactory progress has been made in the production of quinine during the year under review. The Governor in Council is pleased to record his appreciation of the work Mr. Calder has done for the department during the year. Recognition of good work accomplished is also due to Mr. Shaw and the other officers of the department. Special thanks are due to Mr. Thomas, Manager of Munzong, for the unremitting and well-directed efforts he has made to cope with adverse conditions on his plantation.

(11) When the petition refers to matters in which the petitioner has not a direct personal interest, unless it is a petition of the kind described in the note to clause (5).

(12) When the petition is a representation against an order against which under the appeal rules published by the Secretary of State in Council under section 96B (2) of the Government of India Act, or by the local Government in exercise of the powers delegated to it under those rules, no appeal lies.

(13) If a petition is withheld, the petitioner should be informed of the fact, and the reason for it.

#### DEPARTMENT OF AGRICULTURE, BENGAL.

##### First Forecast of the Spring Oilseed Crops of Bengal, 1929-30.

(NOTE.—On an average of the five years ending 1927-28 the area under Linseed in Bengal has represented some 3·2 per cent. and that under rape and mustard 11·7 per cent. of the total area under these crops in British India).

**Explanatory.**—Three forecasts are issued for the spring oilseed crops. The present one deals with the area sown and the condition of the crops.

**Area sown.**—Oilseeds are grown chiefly in the Rajshahi, Dacca and Presidency Divisions. In the other two divisions, the cultivation is small. The total area under these crops (excepting sesamum for which separate

forecasts are issued) is returned at 854,600 acres this year as against 877,400 and 884,300 acres, respectively, in the corresponding and final forecasts of last year.

**Character of the season.**—The rainfall in September, though defective, was sufficient for the preparatory tillage. In October heavy rain delayed sowings in the greater part of North Bengal and in Hooghly and Mymensingh. Elsewhere the operations generally commenced in the normal time. Dry weather in November has been helpful to further sowings and has also enabled the crops to recover from the evil effects of wet weather in October. The present condition is reported to be fair on the whole.

Director of Agri., Bengal (offg.).
